High-value vs Low-value Customer Retention

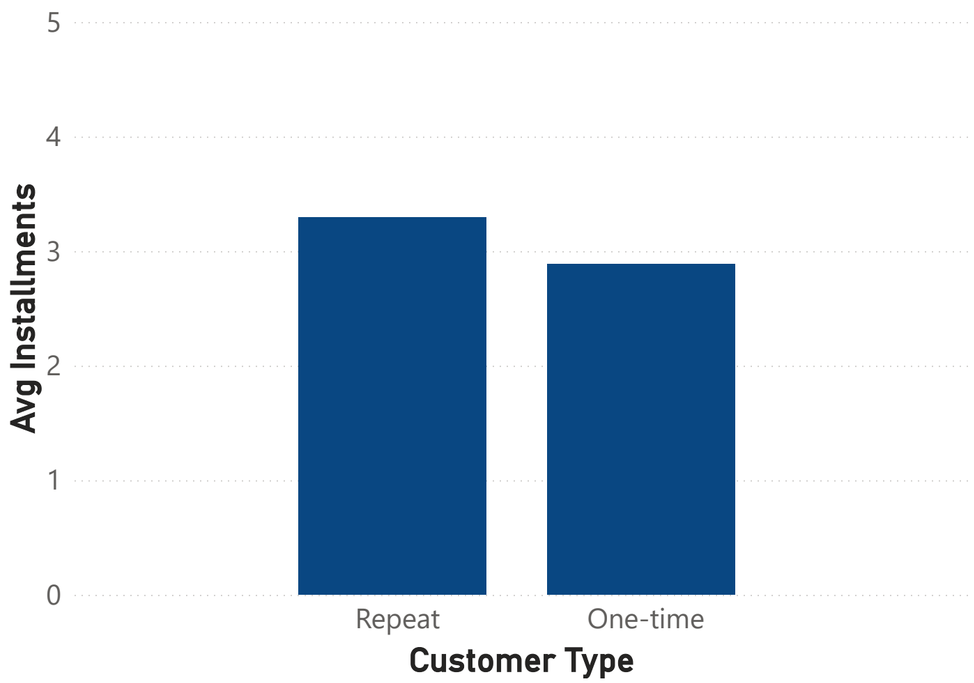

New Customer Acquisition by Month

Churn Drivers

Avg Installments: One-time vs Repeat

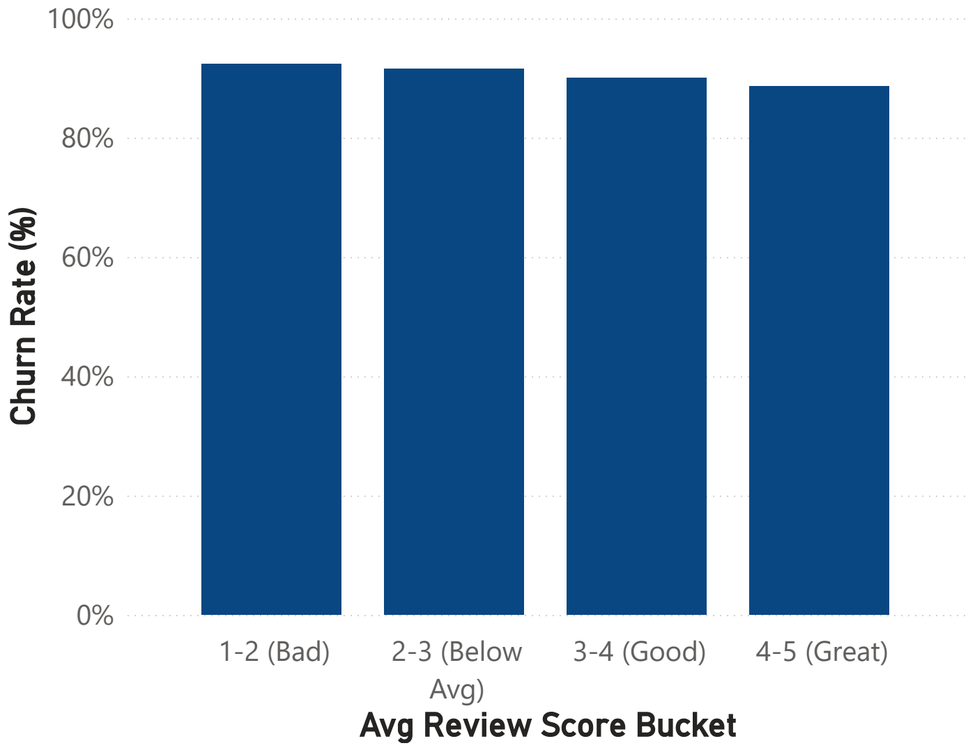

Avg First Order Value: One-time vs Repeat (R$)

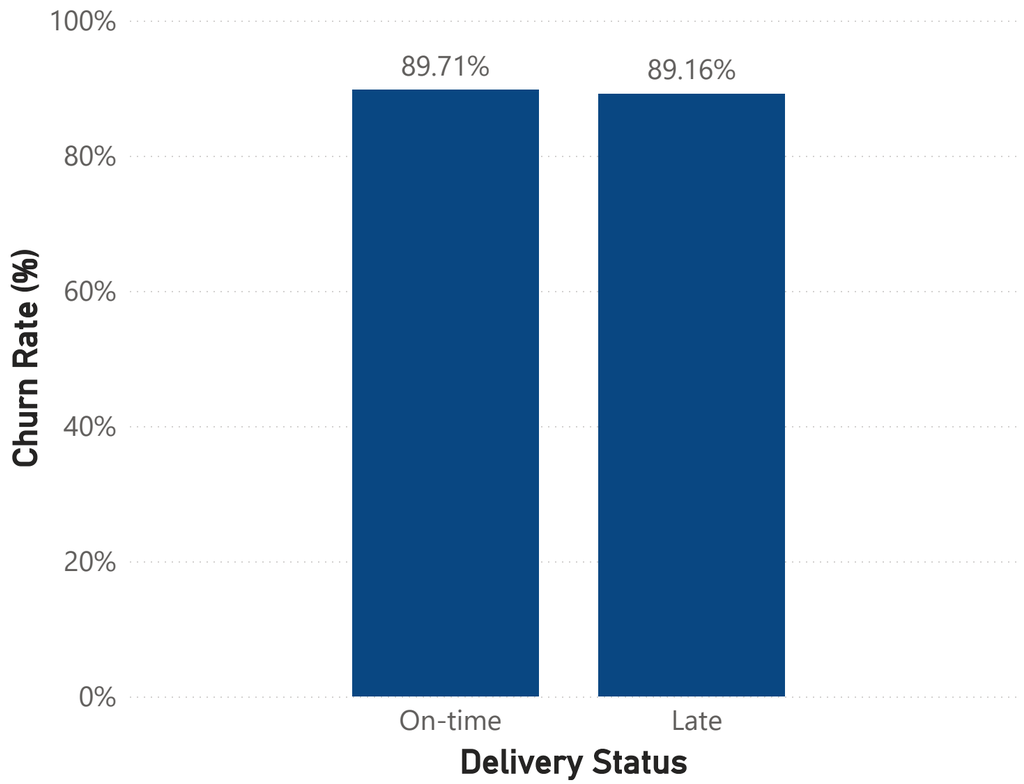

Churn Rate by Review Score

Churn is high across all review buckets; review score is a weak standalone driver.

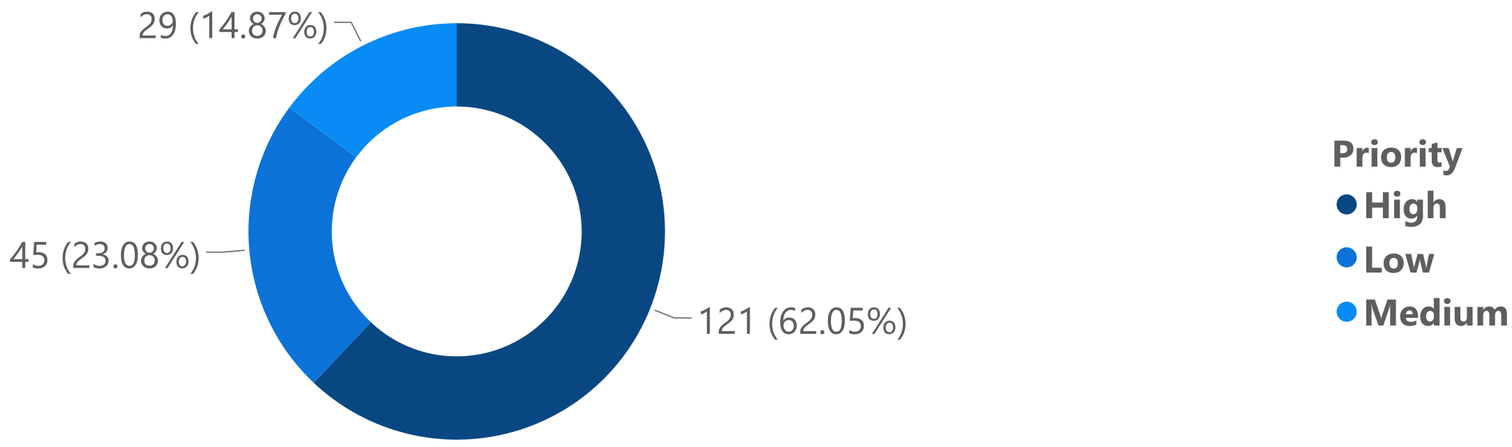

Churn Rate: Late vs On-time Delivery

At-Risk Customers

At-Risk Customer Priority (Repeat Customers, 3+ Orders)

High-Priority At-Risk Customers (sorted by Gap Ratio)

Customer ID	Total orders	Avg days between orders	Days from last order	Gap ratio	Priority
